EDUCATION

Thapar Institute of Engineering and Technology, Patiala **CGPA: 7.54 (present)**
Bachelor of Engineering in Electronics (Instrumentation & Control) Engineering *09-2021 – 06-2025*

Manav Sthali School, Delhi **95.00%**
CBSE - PCM, 12th *03-2021*

Manav Sthali School, Delhi **93.20%**
CBSE, 10th *03-2019*

EXPERIENCE

Data Analyst Intern **10-2023 – 01-2024**
Eastute Solutions Pvt. Ltd. *Delhi, India*

- Developed India's first AI-powered Interior Design software, enabling interior designers and homeowners to visualize their creative ideas with over 95% accuracy and a 50% reduction in design time.
- Leveraged the Stable Diffusion Machine Learning Model to achieve state of the art design and visualization capabilities, processing thousands of design variations in seconds.

Data Analyst Intern **02-2024 – 03-2024**
1Stop *Delhi, India*

- Developed a machine learning model with a 90% accuracy rate in predicting diabetes by analyzing patient data, facilitating early diagnosis and enhancing disease management for over 1,000 patients.

PROJECTS

Predict Diabetes with ML **[GitHub Link]**

- Employed advanced machine learning techniques to preprocess and manipulate the Pima Indian Diabetes dataset, ensuring high data quality and consistency.
- Developed a predictive model capable of identifying individuals at risk of developing diabetes, achieving over 70% accuracy as validated by the confusion matrix.

Development of Solar Based Wireless EV Charging System **[Drive Link]**

- Engineered a Solar-Based Wireless EV Charging System enabling dynamic on-road charging via solar energy and inductive coupling, promoting sustainable mobility.
- Designed an efficient prototype to reduce charging downtime and dependency on grid power.

Hospital Management System **[GitHub Link]**

- Designed and implemented the database schema using SQL and API endpoints, ensuring secure and efficient data management
- Developed front-end components using React.js, enhancing user experience and facilitating smooth interactions for patients and staff

Car Detector System **[GitHub Link]**

- Utilized Python and OpenCV to process images and videos, developing a system that analyzes traffic camera footage to identify and track moving objects, particularly cars.
- Engineered a solution that captures one picture per identified car and uploads these images to a database for further examination and analysis.

ACHIEVEMENTS AND CERTIFICATIONS

- **THAPAR SUMMER SCHOOL ON MACHINE LEARNING AND DEEP LEARNING,** THAPAR INSTITUTE OF ENGINEERING AND TECHNOLOGY
- **DESIGN AND ANALYSIS OF ROBOTIC ARM,** THAPAR INSTITUTE OF ENGINEERING AND TECHNOLOGY
- **PREDICT DIABETES WITH MACHINE LEARNING,** FOX TRADING
- **HTML, CSS, JS,** YOUACCEL
- **JAVASCRIPT, BOOTSTRAP, PHP,** YOUACCEL
- **INTERNET OF THINGS (IOT),** SMART KNOWER

TECHNICAL SKILLS

LANGUAGE: C, SQL, C++, MySQL, HTML, CSS, Java Script, Python, R Programming, MATLAB, OOPs
FRAMEWORKS: Mongo DB, Express JS, Bootstrap, Node JS, PHP, React
TOOLS: Git Hub
